+91-957-342-4443 santazsahithi@gmail.com in Santaz-Sahithi Santaz-Sahithi Bangalore India

Education

Indian Institute of Technology Bhilai

July 2019 – May 2023

Bachelors in Computer Science and Engineering

- GPA: 7.15/10
- **Coursework:** Machine Learning, DBMS, MySQL, Operating Systems, Data Structures

Technologies

Libraries: ReactJS, NodeJS.

Framework: HTML, CSS, SCSS, JavaScript, Vue, Tailwind.

Languages: C, Python, Java, Typescript.

Skills: Figma, Data Structures, Machine Learning, Artificial Intelligence, Selenium, SonarQube.

Experience

Full Stack Developer

[Novaluna Tech](#)

Novaluna Technologies

Dec 2023 – Dec 2024

- Engaged directly with clients to gather project requirements, provide insights, and implement feedback-driven adjustments, enhancing client relations and ensuring alignment with business goals.
- Designed a comprehensive website layout and user interface for Elexport Overseas using [Figma](#) demonstrating a high level of proficiency in **UI/UX** design and attention to aesthetic detail.
- Led a multidisciplinary project team, efficiently delegating tasks, coordinating workflows, and fostering collaboration to meet critical project milestones and deliverables.
- Developed a robust skill set in web design, client communication, and project management, consistently contributing to successful project outcomes and client satisfaction.

Volunteer

[Broseph Foundation](#)

The Broseph Foundation

Aug 2024 – Oct 2025

- Developed and Maintained internal community management software for the foundation.
- Led and managed the 'Abbakka Brigade', the foundation's women's wing, focusing on community management and leadership.
- Organized and coordinated various large-scale community volunteering events.
- Assisted in the selection and onboarding process for new organization volunteers and members.

Projects

Machine Learning

Interpreting the Latent Space of GANs for Semantic Face Editing

10/2021 – 12/2021

- Designed and implemented a fake face detection system as part of a project on GAN-generated images.
- Interpreted multiple latent features simultaneously in the GAN latent space, overcoming significant technical challenges to achieve this breakthrough.
- Leveraged these insights to enhance semantic face editing techniques, demonstrating innovation and problem-solving skills in advanced AI research.
- Successfully interpreted multiple latent features of GANs simultaneously, overcoming significant challenges through innovative problem-solving and collaborative efforts.

Portfolio

[santaz-sahithi.github.io](#)

- My portfolio website built with parallax effect while also using and learning scss alongside.
